

Procedure

In this activity you will work within a research team lead by your teacher to develop an aerospace evolution documentary. Within the research team you will be responsible for the contribution of research artifacts relating to the cause and effect of a major aerospace industry milestone.

- 1 On your own, without conducting research, list ten major aerospace industry advances or accomplishments from 1903 to present day.

1.
2.
3.
4.
5.
6.
7.
8.
9.
10.

- 2 Form a research group with 2 other students

List their names

a. _____
b. _____

3

Within your research discussion group each member will discuss and explain their list of ten aerospace industry advances or accomplishments. During the discussion members of the group should ask the following questions:

- a. How did the aerospace advancement/ achievement occur – what were the driving factors that pushed for the advancement?
- b. What previous aerospace advances made the advancement / achievement possible?
- c. How did the aerospace advancement / achievement lead to future aerospace advancements and achievements.

Record your answers to questions 3a, 3 b,and 3c

4

As a research discussion group identify your group's twenty most significant aerospace advances / achievements.
